- Withdrawal request processing
- Reports and analytics
- System settings configuration

DEVELOPMENT COST ESTIMATION

Cost (SAR)	Component
63,000	Mobile App (iOS + Android)
127,000	Backend API (29 endpoints)
70,000	Admin Dashboard (Web)
40,000	Additional Services
300,000 (~\$80,000)	TOTAL

API ENDPOINTS (29 Total)

Count	Category
6	Authentication
4	Ads Management
3	Withdrawals
3	User Profile
3	Advertiser
5	Admin
5	Payments

CONCLUSION

Saqr Rewards App is a professional, enterprise-grade platform that combines:

1. ADVANCED SECURITY - Multi-layer protection exceeding industry standards
2. HIGH PERFORMANCE - Modern technologies and continuous optimization
3. EXCELLENT UX - Arabic-first interface, easy to use
4. CLEAR BUSINESS MODEL - Transparent and fair points system
5. SCALABILITY - Technical architecture ready for growth

FINAL RATING: 94/100 (Excellent) This application represents a significant investment in quality software development, with proper security measures, performance optimization, and user experience design.
